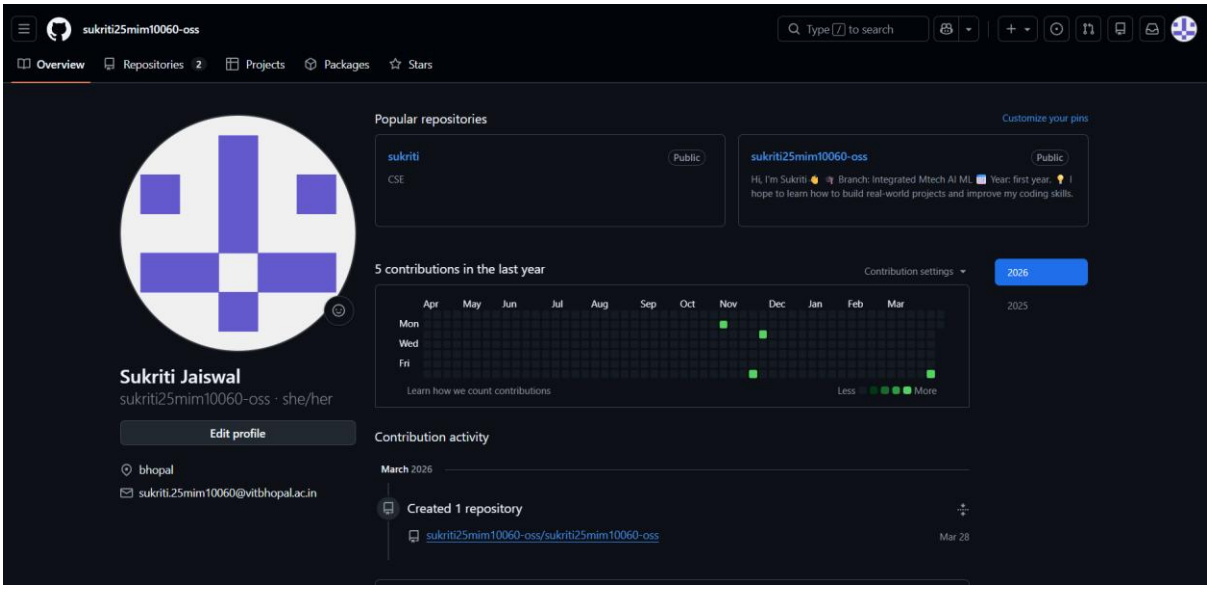
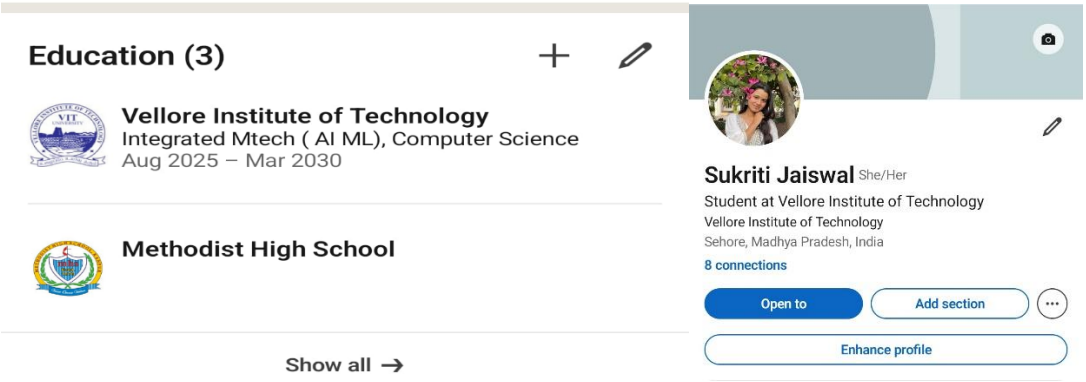
Task 2:

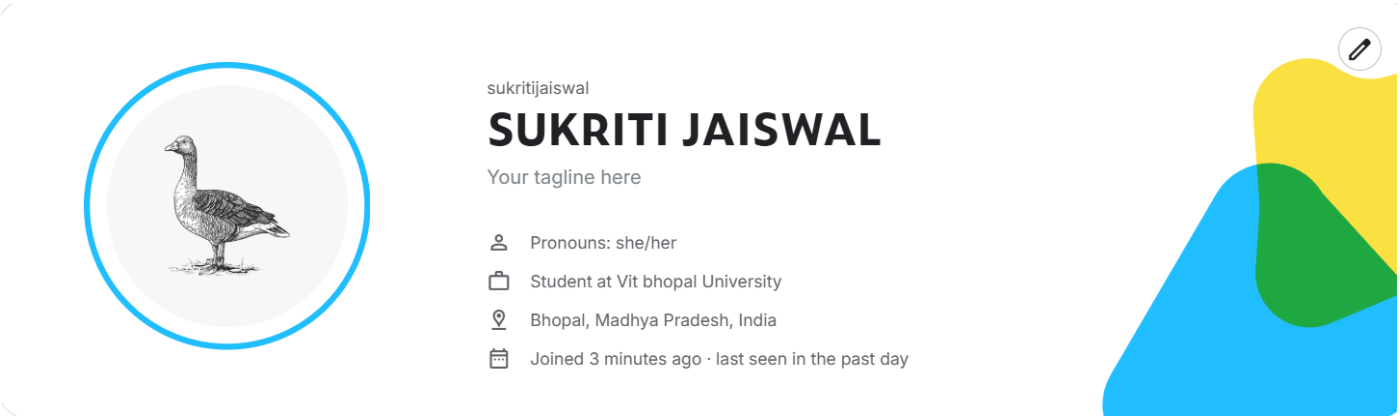
GitHub ss:



Linkedin profile:



Kaggle Profile:



Task description:

For this task, I chose platforms such as **LinkedIn, GitHub, and Coursera** because they are widely used for professional growth and learning. **LinkedIn** is a professional networking platform where individuals can create profiles, connect with others, and explore job opportunities. **GitHub** is mainly used by developers to store, manage, and share code, as well as collaborate on projects. **Coursera** is an online learning platform that offers courses from top universities and organizations to build new skills.

Over the next four years, I plan to actively use these platforms to support my academic and career development. On LinkedIn, I will build a strong professional profile, connect with industry professionals, and stay updated with career opportunities. On GitHub, I aim to upload my projects, improve my coding skills, and collaborate with others to gain practical experience. Through Coursera, I will complete relevant courses and certifications to strengthen my knowledge in my field of interest.

Using these platforms consistently will help me enhance my skills, build a professional network, and prepare for future career opportunities.
